rejuvi g AHA CREAM & SERUM

Although alpha-hydroxy acids (AHA) has been on the market for over 2 decades, It is still a viable and effective anti-aging technology. Nothing could totally replace AHA today.

- ***AHAs can diminish corneocytes (dead skin cells) to promote skin exfoliation and cell renewal rate.***
- ***AHAs can dissolve desmosomes (adhesion) that bond keratinocytes to soften or normalize skin tissues.***
- ***AHAs can stimulate productions of collagen and elastin.***

Rejuvi utilizes AHA complex (combining alpha & beta hydroxy acids) at concentration about 10% with pH range 3.5 to 4.0 for effective and safe skin rejuvenation. Moreover Rejuvi utilizes unique lipoceutical delivery system (liposome-like) to reduce irritation and increase penetration & rentention. Rejuvi g AHA Cream with adequate skin moisturization is designed for normal, aging or acne skin. There is also a gentle verison available for sensitive skin. Rejuvi g AHA Serum is designed for oily and acne skin.

DIRECTIONS & NOTES

Rejuvi g AHA Cream is packed in jar (50 grams) and Rejuvi g AHA Serum is packed in a glass bottle with a dropper (30 grams). Both cream and serum ought to be used at night and sun protection products should be used in daytime.

Skin has well-known ability to adapt AHA and BHA. To avoid stinging or discomfort, it is recommend to use sensitive version with less frequency such as every other day to twice a week. After the skin becomes used to, then use every night or switch to the normal verison.

Rejuvi AHA Cream and Serum have been used by numerous people with excellent feedback !
